Hi –

Current CO<sub>2</sub> levels are not normal. They are dangerously high and increasing. We need to switch to net *negative* CO<sub>2</sub> emissions immediately.

Arizona should be the Saudia Arabia of renewable energy. Why is this not happening? Why is the government subsidizing coal-burning power plants? It's beyond insane.

As a related matter: Scott Pruitt has got to go. Impeach and remove Pruitt now, for the following reasons:

- In his official capacity, gross dereliction of his duty to carry out the laws to protect the environment.
- In his personal capacity, scandalous corruption, even by the standards of this spectacularly corrupt administration.
- Going through the impeachment process will be good practice.

Yours truly,

*John L Denker*
